FALL
1935

PITZONKA'S *Giant-Flowering* *Mixture of* PANSY PLANTS

FOR forty years we have been selecting and improving the strains in this mixture. The plants themselves are healthy, strong and compact in habit of growth, and bloom freely. The flowers are veritable giants, with velvety, glistening petals, and carried on long stems. The colors are almost beyond description, varying from delicate orchid and yellow to deep purple, blue, and red. Unquestionably this Giant-flowering Mixture of Pansy Plants is the most desirable mixture obtainable.

LARGE PLANTS, \$1.20 per 100, \$9.75 per 1000

SIMPLE . . . SUGGESTIONS

For Growing Pansies

We specialize in Pansy Plants and in Pansy Seed, and have had many years' experience in growing plants and in selecting strains and varieties. Naturally, we have learned many things about Pansies and are convinced that anyone can succeed in Pansy culture, provided the soil is in good condition and certain simple rules are obeyed. Here is some information that we know will be helpful.

1. Select a sunny location, but if possible a place that will receive some shade in the afternoon. Good garden soil will be satisfactory, provided drainage can be furnished; if drainage is lacking, raise the bed about 4 inches above the surrounding soil, adding a considerable amount of sand and plenty of humus.
2. Cover the entire bed with 1 inch or more of well-rotted stable manure if it can be obtained. If you cannot secure stable manure, use pulverized sheep- or cow-manure. This covering should be turned under to a depth of 6 to 8 inches, letting it stand for several weeks before setting the plants.
3. If the soil on the bed is dry it should be soaked thoroughly and allowed to dry off until it is not sticky; then pulverize it to a depth of about 6 inches, firm it, and set the plants not less than 4 inches apart—a greater distance if you have the space. They should be set only as deep as they were in the nursery, and the crown should not be covered. Water the bed after planting and give shade during the middle of the day until the plants are well rooted.
4. After the plants have become well established, at intervals of 6 to 8 weeks, give an application of pulverized sheep- or cow-manure, or commercial fertilizer, which must be used strictly according to directions. Pansies are heavy feeders and in order to have large and highly colored flowers the soil must be very rich.
5. After the ground is frozen hard, a light mulch of hay or straw will be required. Do not cover the bed so heavily that the plants cannot be seen, or they will be smothered. In our nursery we find that about the middle of December is the proper time to cover the plants.

LARGE SIZE

REGULAR SIZE

Please study these two pictures. Both are much reduced from natural size, but they do tell a real story of Pitzonka's Pansy Plants.

The first picture shows the type, foliage, and the root-growth of our Large Pansy Plants. These Large Plants are a little older than the Regulars, are larger and better developed, and therefore bloom quicker and give large flowers from the start. The Large Plants are recommended for greenhouse Winter blooming.

One of Pitzonka's Regular Size Pansy Plants is pictured in the second illustration. These are younger plants, but are grown under exactly the same conditions and culture as the Large Plants. They will be a little longer in developing but will give just as fine flowers when fully grown. All they need is a little more time.

While Pansy Plants and Pansy Seed are important parts of our service to gardeners, we have other things that you may need. We invite you to send for

Our New Catalog of Hardy Plants

which presents novelties and old familiar plants that the well-planned garden demands.

Our Special Price-List of Fall Bulbs

will introduce those Tulips, Narcissus, Hyacinths, and other Spring-blooming bulbs found in the best gardens.

PANSIES ~

Recent Novelties

From the multitude of varieties that are introduced each year by foreign and American growers we have selected four that we believe are best adapted to general garden use. We have tested these four varieties in our nursery, in our trial-grounds, and have observed them under general garden conditions. While it is true that there are other good novelties, we have selected these as the leaders for the present season. The plants are strong growing and free blooming, while the colors are so distinct as to justify the term of "leading novelties."

GIANT LAVENDER. A pleasing shade of lavender with but slight variation. Flowers of fine texture are borne well above the foliage on strong, stiff stems. We highly recommend this variety.

GIANT RED. Same type as preceding, with flowers in shades of red.

MAPLE LEAF GIANTS. The increasing popularity of this distinct variety warrants us offering it again this season. Heavy foliage, and flowers 4 to 5 inches across, of heavy substance and in many attractive colors and color combinations, make this an outstanding Pansy.

MRS. PIERRE S. DU PONT. A really novel color in Pansies. Rich golden apricot with creamy tint, flushed salmon. Blooms slightly smaller than other varieties of Giant Pansies, but plants are very free flowering.

65 cts. for 25, \$2.00 per 100

Named Varieties

FURNISHED IN SEPARATE COLORS

Frequently the gardener desires to use Pansy Plants to secure an immediate color scheme. They are especially desirable for edging hardy borders, for setting around a bed of tulips, for use in the rock-garden, or for outlining a cemetery lot or an individual grave. Pansies may be used in a multitude of ways, and these standard varieties will give you an opportunity to carry out many garden ideas. All of the plants are compact growers, yet the stems are not so short as to render the blooms useless for cutting. While the flowers are not quite so large as those of the mixed types, they will give a wonderful effect.

Alp-Glow. Cardinal shades, with dark blotches.

Blue Boy. Clear and pure silvery lilac. A bed of this variety gives an effect of striking beauty.

Bronze. Peculiar shades in bronze.

Golden Queen. Bright pure golden yellow.

Golden Yellow. Large brown eye.

King of Blacks. The nearest to black in Pansies.

Lake of Thun. True splendid ultramarine-blue. The most beautiful of all blue Pansies. An exact duplicate of the Emperor William with much larger flowers. Excellent when used with Golden Queen.

Lord Beaconsfield. Deep purple-violet shading off in the top petals to a white line. Fine for graves.

Royal. Deep purple; very pretty.

Snow Queen. Pure white.

Regular Size Plants, 90 cts. per 100, \$7.50 per 1000

Large Plants, \$1.40 per 100, \$12.00 per 1000

*We do not supply less than 50 plants of any one color.

PITZONKA'S PRIZE MIXTURE OF PANSY PLANTS

All plants in this mixture have been carefully selected, are robust and healthy and will produce very large shapely flowers, uniform in size, and carried on strong, vigorous stems. The collection is made up of colors which are entirely distinct from those in the Giant-flowering Mixture. It includes shades of red and pink, rich yellow, blue, orchid, black, and many others of equally fine character; there are others with pencil stripes and blotches, thus avoiding the variegated colors which have no particular shade. We have been improving this strain for many years and believe it is one of the finest that we have produced.

REGULAR SIZE PLANTS, \$1.40 per 100, \$10.00 per 1000

LARGE PLANTS, \$2.00 per 100, \$15.00 per 1000

Not less than 50 plants at the 100 rate; 250 at the 1000 rate

ENGLISH DAISIES

Bellis perennis

Especially adapted for bedding, for edging borders and pools, and extremely desirable for giving touches of color to the rock-garden in early Spring. In moist, shady places they will continue to bloom well into the Summer. The plants should be mulched lightly in sections of the country where the ground freezes. Cultural directions same as for pansies.

Longfellow. Rose color. Free blooming, but the flowers are smaller than those of the Monstrosa plants.

Monstrosa Strain. Surpasses all others in strong, robust growth and extra-large, double flowers. We offer Monstrosa Red, Monstrosa Rose, Monstrosa White, and Monstrosa Mixed Colors. Please take your choice of color or mixture.

Plants, 75 cts. per 100, \$5.25 per 1000

Monstrosa tubulosa, Etna. *Novelty.* A recent introduction with quilled flowers which are slightly smaller than the other Monstrosa varieties. The color is a beautiful dark red. Plants, \$1.00 per 100.

FORGET-ME-NOT

Myosotis alpestris

One of the old familiar garden plants adapted for bedding or for edgings in connection with pansies and Spring-flowering bulbs. From early Spring until Midsummer or early Autumn the plants should be covered with the dainty flowers. Myosotis is a biennial, so plants set this Fall will bloom next Spring. It is advisable to give the plants slight protection during the Winter.

Alpestris, Victoria. Large, azure-blue flowers. Plant bushy in habit. 6 in.

Alpestris, Victoria, Indigo Blue. Similar in form to the preceding but the flowers are deeper blue.

Alpestris, Victoria, Rose.

Robusta grandiflora. Large, clear blue flowers on stems about 10 inches long. The plants are extra-strong growers.

Plants, 90 cts. per 100, \$6.00 per 1000

An order for plants must amount to \$2.00 or more

VIOLAS—*Tufted Pansies*

All varieties in this list are adapted for bedding purposes, and are almost indispensable for Spring gardening. Various colors can be selected to work out extremely interesting color schemes. If the plants are set in the early Fall so they may be established before freezing weather, they will give an abundance of flowers in the early Spring. If dead blossoms are removed regularly, new flowers will appear and the plants will continue to bloom throughout the Summer. If the plants become too tall during the Summer months, they may be cut back and allowed to produce new foliage. Violas are perfectly hardy and may be given the same treatment as pansies.

Recent Viola Novelties

ARKWRIGHT RUBY. Large-flowered type. Color a beautiful bright rosy crimson, with terra-cotta shadings, making it an outstanding variety. It has the added attraction of being very fragrant. A most desirable addition to the Viola group.

BOSNIACA. Deep red. Dwarf; free flowering. Excellent for rockeries and edgings, as it blooms the entire season. Thrives best in a sunny place.

BOWEL'S BLACK. Glossy black flowers with golden center. A unique and pretty variety. Excellent for rockeries. Growth upright. Flowers during the entire season. Rare.

GRACILIS, LORD NELSON. Glowing violet-purple. Flowering period begins in March and ends in late Autumn. Habit of growth is stocky.

ROSY GEM. One of the novelties developed in this group. Bright rose flowers. Neat growing.

YELLOW GEM. Another large-flowered, deep pure yellow. Plants robust and very free flowering.

Plants, 50 cts. for 10, \$1.00 for 25

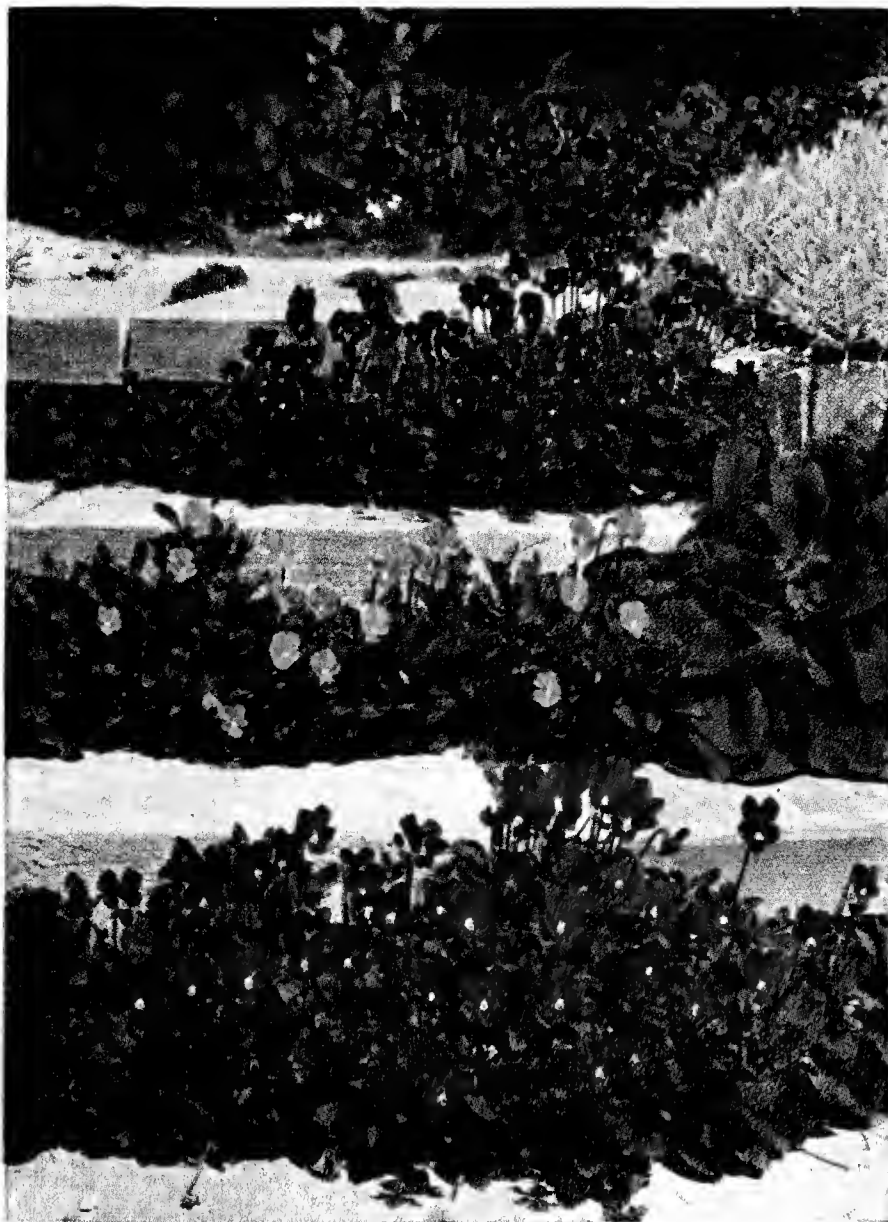

*Not less than 10 plants of
any one of the above
Novelties*

White Perfection

Arkwright Ruby

Violas adorning garden steps, growing in a soil pocket especially prepared for them at the back of the stone treads

Violas You Should Grow

Admiration. Deep violet. Well named because of its beauty.

Blue Perfection. Light blue with yellow eye. A very free-flowering variety.

Lutea Splendens. Rich golden yellow. Lovely when used with the blue varieties.

White Perfection. Clear white. One of the most desirable sorts.

Mixed Varieties. For this mixture we grow many different varieties, so there may be a wide range of color. A hundred plants will make a gorgeous showing.

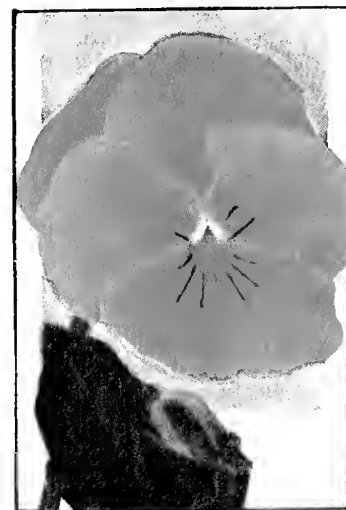

Plants, \$1.00 per 100,
\$7.50 per 1000

Apricot Queen. A fascinating shade of apricot, orange toward the center, that compels the admiration of all. We find that the best results are obtained by planting in full sun. Plants, \$2.00 per 100.

*Not less than 25 plants will be
furnished in any one color*

PANSY SEED

Those gardeners—professional or amateur—who wish to grow their own plants should be sure that the seed is the best obtainable. It must be properly matured and harvested; it must be fresh; it must be strictly true to variety name. Pitzonka's Pansy Seed fills all these demands. The seed-stock plants are grown in our own fields by experienced men; at the proper time the seed is harvested, cleaned, and stored under conditions that insure a high percentage of germination. And, of course, the seed is absolutely true to variety—our methods insure that point.

ENGLISH DAISY SEED

Bellis perennis

Particularly desirable as a low border plant, as it rarely grows more than 6 to 7 inches in height. The flowers, which are button-shaped, not more than 1½ inches in diameter, are produced very freely in May and June. The seed of the varieties here listed is produced from plants in our own grounds and is given the same careful attention that we give to pansy seed. The directions for growing pansies may be applied to the English Daisies.

Directions to Customers

ORDERING

We aim to execute orders as soon as received, but in the rush season slight delays are unavoidable, and when such is the case an acknowledgment will be sent at once. By ordering early and giving a shipping date we will be pleased to ship so that the orders reach their destination on or about the date specified. When no shipping instructions are given, orders are filled in the rotation in which they are received.

TERMS

Those desiring to open accounts will please furnish references from three parties with whom they have had credit relations and allow sufficient time for us to investigate, otherwise cash must accompany order.

Remittances should be made by Post Office Money Orders, Drafts on New York or Philadelphia banks, or Express Money Orders, in amount sufficient to cover the complete order. Where it is impossible to obtain these, the letter should be registered. We cannot guarantee receipt of money sent in any other way. We reserve the right to decline C.O.D. orders.

No charge is made for boxes or packing, *except on shipments sent Parcel Post prepaid*, and the additional cost for packing, and postage on these is covered by the additional 10, 15, and 20 per cent as per table of rates.

In filling out your order, always give shipping directions, and write *Name and Address distinctly* on each and every order.

SHIPPING

It is customary for our patrons to receive their orders from us in perfect condition. However, there are times when plants arrive slightly withered. When that happens, place only the roots in water, in order to revive them. Never set out a withered plant.

Claims for shortage, etc., must be made within five (5) days after receipt of goods.

HOW WE SHIP

All orders are forwarded by Express or Parcel Post, purchaser paying charges. For those of our customers who wish their orders sent by Parcel Post, prepaid, additional charges must be added for special packing and postage. Rates as per states is listed hereon.

These Plants Will Thrive Best

if Set in the Garden this Fall

Fall planting is fully as practical and successful as Spring planting. Many plants thrive better when set in the Fall; the roots become established before the ground freezes, and Spring's first warm days start the growth; then blooms come quickly.

	Color	Blooming time	Height	Each	10	100

Delphiniums

RARE indeed are the plants that are as stately as Delphiniums, and still rarer are the plants that are so popular in modern gardens. The rich tones of blue seem to reflect the colors of the sky, and are only enhanced in loveliness by the mauves and pure whites. The flower-spikes are from 4 to 6 feet tall, and covered for almost half their length with blooms. Plants should be set in well-prepared soil in Fall or early Spring; use bone-meal as a plant-food; do not allow seed to form.

Belladonna, Blue Grotto. *Novelty.* The blooms are an intense and brilliant deep indigo-blue. It has all of the good qualities of the Improved Belladonna, but the color differs from Bellamosum. A splendid variety for cutting. Plants, 25 cts. each, \$1.80 for 10, \$12.00 per 100.

Belladonna, Improved. Excels all other Delphiniums in freedom and continuity of bloom. The color is clear turquoise-blue, unequaled for delicacy and beauty. Plants, 20 cts. each, \$1.50 for 10, \$9.00 per 100.

Bellamosum. A deep blue form of the lighter blue Belladonna. Has the same free-blooming qualities. Plants, 20 cts. each, \$1.50 for 10, \$9.00 per 100.

Blackmore & Langdon's English Hybrids. A wonderful strain with colors ranging from the darkest blue to deep indigo, and also including delicate shades of rose. Flowers both double and single. Plants, 20 cts. each, \$1.50 for 10, \$9.00 per 100.

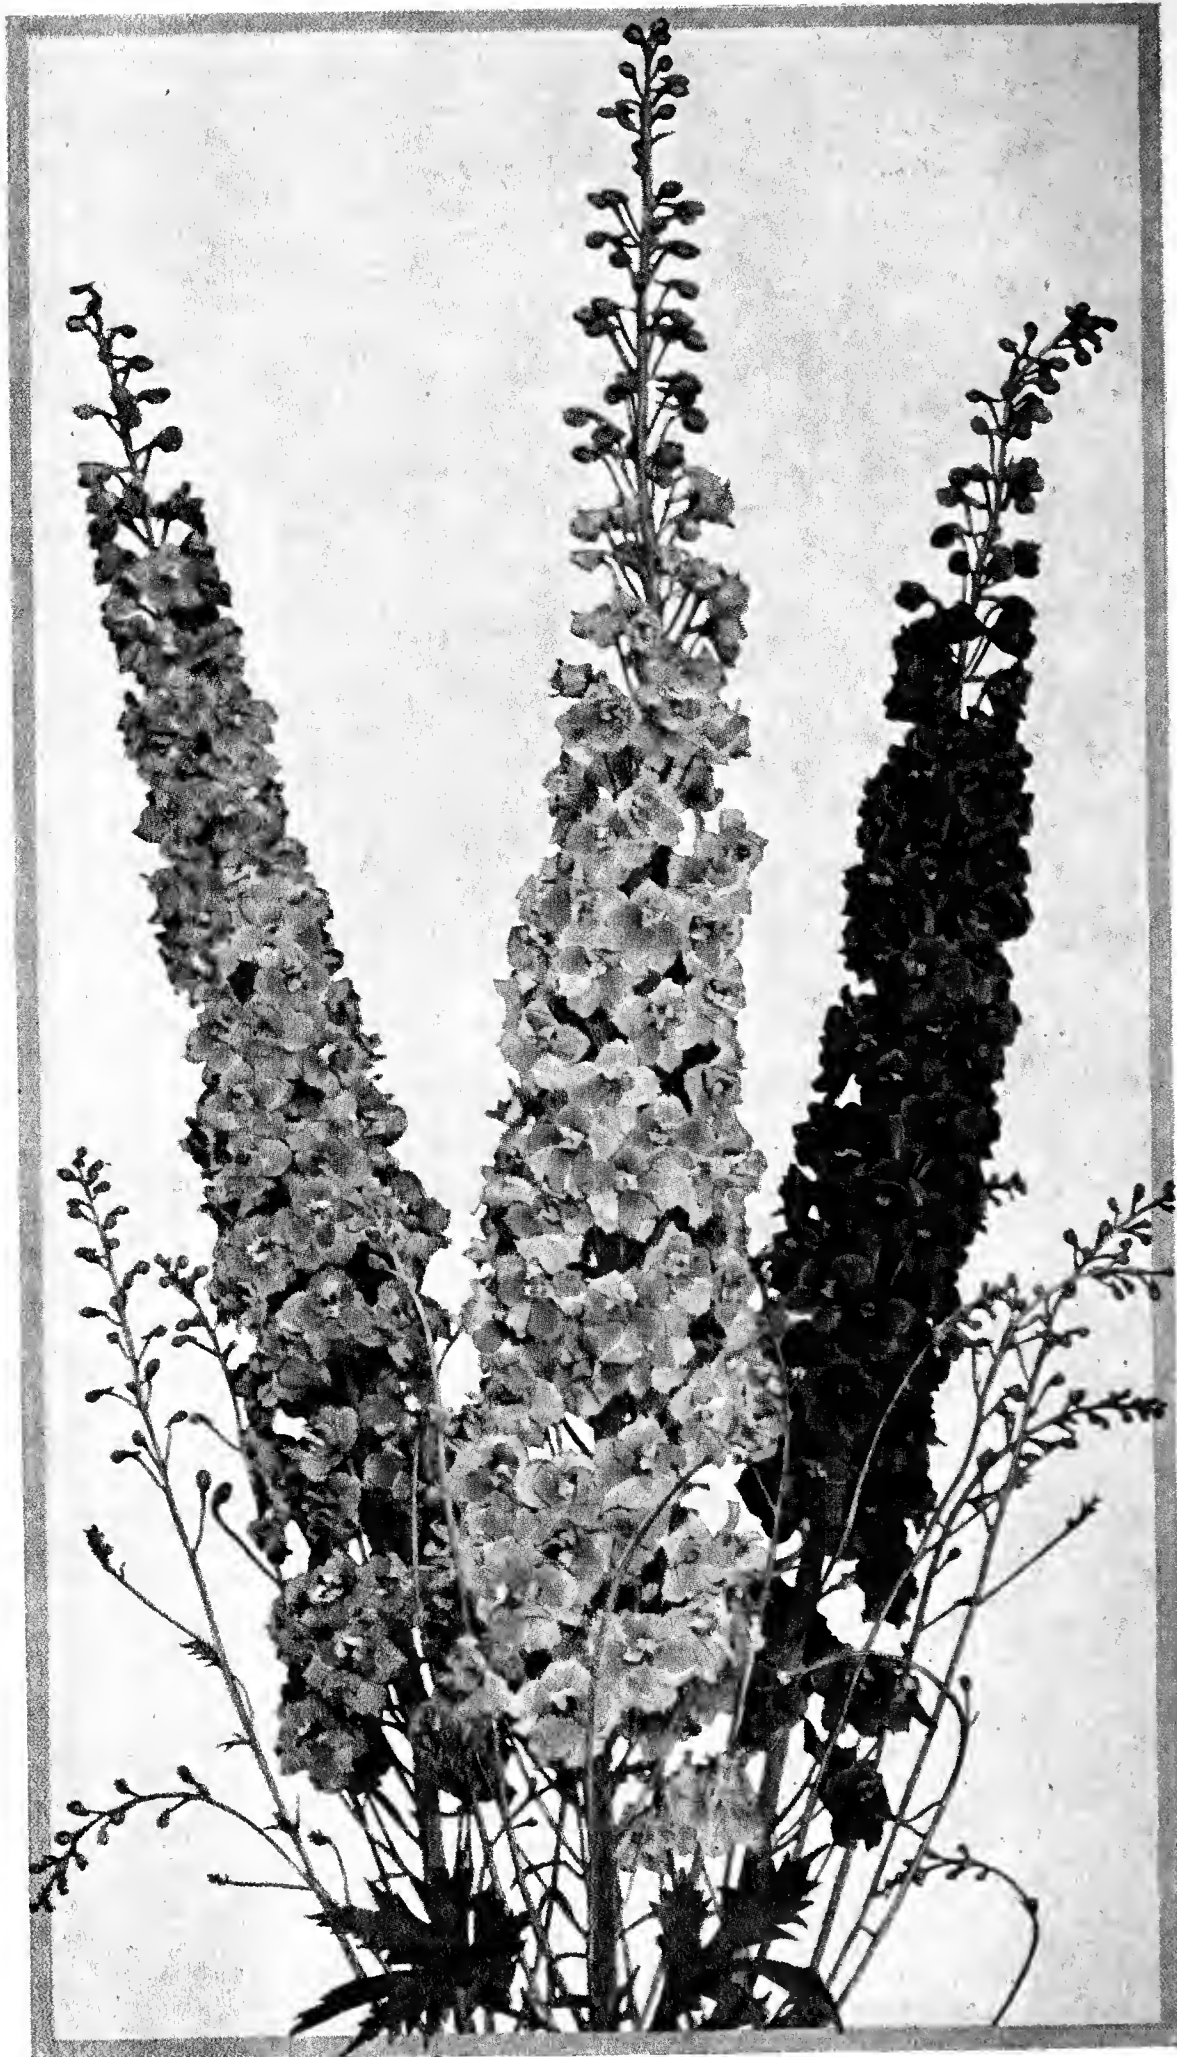

Chinense, Blue Butterfly. Rich ultramarine-blue. Plants grow about 1 foot high and are therefore adapted to rock-garden use. Plants, 20 cts. each, \$1.50 for 10, \$9.00 per 100.

Chinense alba. Similar to the preceding but with white flowers. Plants, 20 cts. each, \$1.50 for 10, \$9.00 per 100.

Dreer's De Luxe Hybrids. Very large blooms which vary in color from pale lavender to deep oxford-blue. The plants are vigorous in habit and carry long spikes with very large blooms. Plants, 25 cts. each, \$1.80 for 10, \$12.00 per 100.

Iceberg. *Novelty.* Long spikes of pure white flowers. The best of the whites and makes a pleasing contrast with the blue varieties. Plants, 25 cts. each, \$1.80 for 10, \$12.00 per 100.

Wrexham's Hollyhock Strain. Distinctive because of the tall spikes, often 5 to 8 feet high, covered nearly half their length with flowers. Colors are shades of blue and violet with white, purple, and black-blue center petals. There are both single and double blooms. Plants, 30 cts. each, \$2.00 for 10, \$15.00 per 100.

PRIZE-WINNING NAMED DELPHINIUMS

These are from the famous Blackmore & Langdon's named assortment. Like many hybrids, the varieties may not come absolutely true to name, but they do show unusual qualities in color and in size of bloom. Our plants are grown from seed saved from selected plants.

A. J. Moir. Gold Medal winner. Blue; white eye. Semi-double.

Blue Gown. Ultramarine-blue; small black eye. Semi-double.

D. B. Crane. Deep lavender with white eye. Semi-double.

Duchess of Portland. A new and desirable variety. Color deep ultramarine-blue; snow-white eye.

Lady Diana. Sky-blue, lightly touched mauve; white eye. Semi-double.

Lady Guinevere. Mauve; white eye. Large, semi-double flowers.

Laura Fairbrother. *New.* Blooms semi-double, mauve, with small white eye. Extra-long flower-spike.

All Prize-Winning Named Delphiniums, 50 cts. each, \$4.00 for 10

An order for plants must amount to \$2.00 or more
